Great Aussie
CARAVANS

Great Aussie was founded by a group of passionate adventurers who believed in the magic of creating homes-on-wheels for fellow wanderers seeking to embrace the nomadic lifestyle. Their journey began with the humble yet sturdy caravans, designed to be the perfect companions for the road less travelled. From the very first caravan that rolled out of their workshop, it was evident that they were onto something special.

With decades of experience in manufacturing, testing and most importantly caravanning, we truly believe that we build the best RVs in Australia. With thousands of happy customers and multiple awards, we believe that when you purchase a Great Aussie, you don't just become a customer, you become part of the family.
